SOVIET MATHEMATICS—DOKLADY
Translation edited by Ben Silver

A translation of the mathematics section of

ДОКЛАДЫ АКАДЕМИИ НАУК СССР

Издательство "Наука", 1990 г.

Each issue corresponds to one volume of the Soviet DOKLADY, which is issued three times a month, six issues constituting a volume.

SUBSCRIPTION INFORMATION. SOVIET MATHEMATICS—DOKLADY is published six times per year. Subscription prices for Volumes 40–41 (1990) are $560 list, $448 institutional member, $336 individual member. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of $8; subscribers in India must pay a postage surcharge of $14. Combination paper and microfiche subscription prices are $745 list, $596 institutional member. Microfiche of each issue will be mailed the fastest way possible before the issue is mailed by the printer. Microfilm subscriptions may be purchased from University Microfilms International, 300 North Zeeb Road, Ann Arbor, MI 48106.

BACK NUMBER INFORMATION. Back number prices *per volume* are: for Volumes 1–20, $426 list, $342 institutional member; for Volumes 21–28, $267 list, $213 institutional member; for Volumes 29–30, $280 list, $225 institutional member; for Volumes 31–32, $372 list, $297 institutional member; for Volume 33, $744 list, $595 institutional member; for Volumes 34–35, $400 list, $320 institutional member; for Volumes 36–37, $412 list, $329 institutional member; for Volumes 38–39, $416 list, $333 institutional member. Back volumes may be purchased on microfilm or microfiche from University Microfilms International, 300 North Zeeb Road, Ann Arbor, MI 48106.

Orders for subscriptions and publications of the American Mathematical Society should be addressed to American Mathematical Society, P.O. Box 1571, Annex Station, Providence, RI 02901-1571. *All orders must be accompanied by payment.* Address changes and other correspondence should be addressed to P.O. Box 6248, Providence, RI 02940-6248.

COPYING AND REPRINTING. Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgment of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Manager of Editorial Services, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248.

The appearence of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of $1.00 plus $.25 per page for each copy be paid directly to Copyright Clearance Center, Inc., 27 Congress Street, Salem, MA 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works or for resale.

Soviet Mathematics—Doklady is published six times per year by the American Mathematical Society, 201 Charles Street, Providence, RI 02904-2213. Second class postage paid at Providence, RI. Postmaster: Send address changes to Soviet Mathematics—Doklady, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248.

SOVIET MATHEMATICS — DOKLADY

Volume 41, Number 1 July-August 1990

CONTENTS

Baladze, È. D. *Solution of the problem of Szőkefalvi-Nagy for zonoids* 1

Gabidzashvili, M. A. and Kokilashvili, V. M. *Weighted estimates for fractional integrals on curves* 5

Kadets, V. M. *Rearrangements of series of functions and various forms of convergence* 8

Kaplan, A. A. *On the convergence of methods of solving variational inequalities with weakly coercive operators* 11

Maksudov, F. G., Magerramov, A. M., and Mamedov, M. Z. *The spectral analysis of pencils of differential operators of special form* 16

Prikarpat·skiĭ, A. K. and Bogolyubov, N. N. *A bilocal periodic problem for Sturm-Liouville and Dirac differential operators, and some applications in the theory of nonlinear dynamical systems* 21

Sabitov, K. B. *Extremal properties of the modulus of solutions of a class of systems of equations of mixed type* 26

Strunkov, S. P. *On a problem of R. Brauer* 30

Averbakh, I. L. *On saddle points of the Lagrange function of the m-dimensional knapsack problem* 32

Andrunakievich, V. A. and Andrunakievich, A. V. *Regularity of a ring relative to right ideals* 35

Vladimirov, V. S., Volovich, I. V., and Zelenov, E. I. *Spectral theory in p-adic quantum mechanics, and representation theory* 40

Vlasov, V. V. *On multiple minimality of a part of the system of root vectors of certain operator-valued functions* 45

Gabov, S. A. *On an abstract Cauchy problem arising in the theory of internal waves in the presence of flotation* 50

Diblik, Ĭ. [J. Diblík] *On the applicability of Ważewski's method for differential equations with delay* 54

Zubov, V. I. *The asymptotic rest position* 59

Kosman, E. G. *Isomorphisms of Sylow p-subgroups of a bounded linear group* . 62

Le Khong Van [Le Hong Van] *Each globally minimal surface in a compact homogeneous space has an invariant calibration* 66

Petrova, I. V. *Some questions in the theory of L_2-approximations on a hyperboloid in $R^{n,1}$* 70

Abdullaev, Ya. Yu. and Dzhabrailov, A. D. *Imbedding theorems for function spaces normed by means of a set of multiple differential-difference characteristics* 76
Adaricheva, K. V. and Gorbunov, V. A. *The structure of finite atomistic lattices of quasivarieties* 80
Klibanov, M. V. and Danilaev, P. G. *On the solution of coefficient inverse problems by the method of quasi-inversion* 83
Kolyadin, V. L. and Kravchenko, V. F. *On a statistically optimal solution of operator equations when the initial data is finite-dimensional* 88
Kostochka, A. V. *On the maximal cardinality of the boundary of a Sperner family* 92
Maksudov, F. G. and Khudaverdiev, F. K. *Study of a multidimensional mixed problem for a class of nonlinear hyperbolic equations* 96
Opershteĭn [Operstein], V. A. *On a constructive characterization of the spaces* $B_{pq}^{\psi}[-1,1]$ *with the help of approximation by algebraic polynomials* 101
Khakimdzhanov, Yu. B. *On characteristically nilpotent Lie algebras* 105
Vasil′ev, D. G. *Two-term asymptotics of the spectrum of natural frequencies of a thin elastic shell* 108
Gasymov, M. G. and Levitan, B. M. *On the expansion in products of special solutions of two Sturm-Liouville equations* 113
Evseev, E. G. and Semenov, A. Yu. *A method for numerical solution of the equations for the dynamics of thin shells, based on separating out rapidly oscillating components* 118
Ivriĭ, V. Ya. *Sharp spectral asymptotics for the Dirac operator with a strong magnetic field* 122
Makienko, P. M. *Modular groups of some rational functions* 126
Maslov, V. P. *On the situation of attractor instability in hydrodynamic turbulence* 128
Prasolov, A. V. *Additivity of strong homology and the continuum hypothesis* ... 133
Tavgen′, O. I. *Finite width of arithmetic subgroups of Chevalley groups of rank* ≥ 2 136
Aseev, V. V. *Plane mappings preserving moduli* 141
Donin, I. F. *On plethysm of representations of symmetric groups* 144
Zil′bergleĭt, L. V. and Lychagin, V. V. *Spectral sequences of stable Spencer cohomology for systems of differential equations over characteristic bundles* . 148
Kosman, E. G. *Structuring of matrices* 152
Lomov, S. A. *Refinement of the notion of asymptotic series for singularly perturbed problems* 156
Temirgaliev, N. *An application of divisor theory to the approximate recovery and integration of periodic functions of several variables* 160
Khimshiashvili, G. N. *On the Riemann-Hilbert problem for a compact Lie group* 165
Vol′berg, A. L. *An inequality of Lojasiewicz for very smooth functions* 170
Kobel′kov, G. M. *A priori estimates for elliptic equations, and iterative methods* 175
Korotkiĭ, A. I. *On integral representation of G-limit operators* 178

Mynbaev, K. T. *Cubature formulas for functions in an anisotropic Sobolev-Liouville space with a weight* 182
Radkevich, E. V. *The operator pencil for the Verigin contact problem* 186
Churbanov, V. V. *An example of a reaction system with diffusion in which the diffusion terms lead to explosion* 191
Table of Contents for the next issue (Vol. 41, No. 2, September–October 1990, Russian original Tom 311, nos. 1–6) 192-a

Volume 41, Number 2 September–October 1990

CONTENTS

Bitsadze, A. V. *On the Neumann problem for harmonic functions* 193
Boĭmatov, K. Kh. *Spectral asymptotics of pseudodifferential operators* 196
Dovzhenko, I. N. and Tsekanovskiĭ, È. R. *Classes of Stieltjes operator-valued functions and their conservative realizations* 201
Melikyan [Melikian], A. A. *A positional method of singular motion analysis in extremal problems of dynamics* 205
Nikol'skiĭ, È. V. *Generalized functiona!ly invariant solutions of a vector equation of potential type* 210
Olevskiĭ, A. M. *On spectrum-preserving approximation* 215
Safarov, D. Kh. *Elliptic regularization of systems of partial differential equations of composite type* 219
Soldatov, A. P. *The general boundary value problem of order $k-1$ for elliptic equations* 222
Agrachëv, A. A. and Gamkrelidze, R. V. *Variation of "time change" in optimal control* 227
Baris, Ya. S. and Lykova, O. B. *Integral manifolds and the reduction principle in stability theory* 232
Kapitonov, B. V. *On the decay as $t \to \infty$ of solutions of an exterior boundary value problem for a strongly hyperbolic system* 236
Lokshin, M. D. *On game control under an integral constraint on the noise* 241
Meleshko, V. I. *On accelerated regularized methods for computing solutions of nonlinear nonregular equations* 246
Novokshenov, V. Yu. *The modulated elliptic function as the solution of Painlevé's second equation in the complex plane* 252
Khrustalev, M. M. and Savastyuk, S. V. *Conditions for optimality of stochastic systems of diffusion type in problems with constraints on the control-observation process* 256
Bagirov, È. B. *Lower bounds for the "tails" of distributions of certain functions of normally distributed random variables* 261

Zhura, N. A. *A nonlocal boundary value problem for the steady-state linearized two-dimensional system of Navier-Stokes equations* 264
Komrakov, B. P. *Maximal subalgebras of real Lie algebras and a problem of Sophus Lie* 269
Nazarov, S. A. and Plamenevskiĭ, B. A. *On radiation conditions for selfadjoint elliptic problems* 274
Soĭfer, G. A. *Maximal subgroups of infinite index in lattices of semisimple Lie groups* 278
Soldatov, A. P. *A general boundary value problem for elliptic systems* 282
Bularas [Boularas], D., Vulpe, N. I., and Sibirskiĭ, K. S. *The problem of a center "in the large" for a general quadratic system* 287
Do Kong Khan' [Đỗ Công Khanh] *Minimality of passive scattering systems in cascade connection* 291
Kapustin, N. Yu. *On solvability in the class L_2 of a characteristic problem for a hyperbolic equation with degeneration of order* 295
Kurzhanskiĭ, A. B. and Nikonov, O. I. *On the problem of synthesizing control strategies. Evolution equations and multivalued integration* 300
Romanov, V. G., Kabanikhin, S. I., and Bakanov, G. B. *Investigation of a differential-difference analogue of a three-dimensional problem in integral geometry* 306
Salakhitdinov, M. S. and Islomov, B. *On a three-dimensional analogue of the Tricomi problem for an equation of mixed type* 310
Serdyukova, S. I. *Quasi-Jordan form for analytic matrices constituting a bounded semigroup* 314
Artyushin, A. N. *Variational inequalities for the wave equation with a constraint on the solution* 320
Askhabov, S. N., Karapetyants, N. K., and Yakubov, A. Ya. *Integral equations of convolution type with a power nonlinearity, and their systems* 323
Kabanov, Yu. M. and Pergamenshchikov, S. M. *On singularly perturbed stochastic equations and partial differential equations* 328
Kir'yanova, L. V. and Rotar', V. I. *On the rate of convergence in a limit theorem for martingales* 332
Laptev, G. I. *Solvability of some classes of quasilinear Volterra parabolic equations* 335
Lepin, L. A. *Spectra of eigenfunctions of a semilinear heat equation* 340
Logvinenko, V. N. *A "multiple" analogue of a theorem of Cartwright for entire functions of several variables* 343
Rzhevskiĭ, S. V. *On the structure of the conditional ε-subgradient method for simultaneous solution of the direct and dual convex programming problems* 347
Sverchkov, M. Yu. and Smirnov, S. N. *Maximal coupling for processes in $D[0,\infty)$* 352
Ven, V. L. and Krysov, Yu. A. *Aggregation and approximation in parametric programming problems* 355

Eremenko, A. È. and Sodin, M. L. *The second fundamental theorem of value distribution theory of meromorphic curves for nonlinear divisors* 359
Zabreĭko, P. P. and Nguen Khong Tkhaĭ [Nguyêñ Hôàng Thái] *Duality theory for ideal spaces of vector-valued functions* 363
Zelinskiĭ, Yu. B. and Mkrtchyan, G. A. *On extreme points and hypercomplex convex domains* 367
Kochetkov, D. V. *On monotone invariant recognition algorithms* 370
Kritskov, L. V. *On necessary conditions for the basis property in $L_p(G)$ of a system of root functions of the one-dimensional Schrödinger operator* 374
Pelyukh, G. P. *On solutions, continuous and bounded on the real axis, of systems of nonlinear functional equations* 378
Chernyshov, K. I. *The method of standard splitting of singularly perturbed differential equations* 380
Table of Contents for the next issue (Vol. 41, No. 3, November–December 1990, Russian original Tom 312, nos. 1–6) 384-a

Volume 41, Number 3 November–December 1990

CONTENTS

Anikonov, Yu. E. *Formulas in multidimensional inverse problems for evolution equations* 385
Bil′man, B. M. and Dzhangibekov, G. *On conditions for the Noether property and the index of some singular two-dimensional integral equations* 389
Goncharov, A. B. *The Weil representation and hypergeometric functions associated to a Lagrangian Grassmannian* 395
Dzhrbashyan, M. M. and Karapetyan, A. O. *Integral representations in the generalized unit disk* 400
Zabreĭko, P. P. and Nguen Khong Tkhaĭ [Nguyễn Hồng Thái] *New theorems on the solvability of operator and integral Hammerstein equations* 404
Kleĭmenov, A. F. *On the cooperative theory of coalitionfree positional differential games* 409
Koĭbaev, V. A. *Subgroups of* GL(2, **Q**) *containing a nonsplit maximal torus* ... 414
Romanov, V. G. and Pukhnacheva, T. P. *Determination of the coefficients of the system of equations of electrodynamics in a class of functions analytic in some of the variables* 417
Rybakov, V. V. *Admissibility of rules of inference with parameters in intuitionistic logic, and intuitionistic Kripke models* 421
Gavrilenko, Yu. V. *Recursion and iteration on Cooper algebras* 425
Dzhrbashyan, M. M. and Karapetyan, A. O. *Integral representations in the generalized upper half-plane* 430

Taĭmanov, A. D. and Taĭmanov, V. A. *On the representation of solutions of an equation in a free semigroup without an identity* 435
Fedorov, F. I. *The metric tensor and tetrads* 438
Gorbachuk, M. L. and Matsishin, I. T. *The behavior at infinity of solutions of a first-order parabolic differential equation in Banach space* 442
Din′ Zung [Dinh Dung] *The Whittaker-Kotel′nikov-Shannon theorem, ε-entropy, and ε-dimension* 446
Egorychev, G. P. *Mixed discriminants and parallel addition* 451
Lelikova, E. F. *On the asymptotics of the fundamental solution of a parabolic equation in the critical case* 456
Rashkovskiĭ, A. Yu. *Theorems on compactness of families of subharmonic functions, and majorants of harmonic measures* 460
Samarskiĭ, A. A. and Makarov, V. L. *On the realization of exact three-point difference schemes for second-order ordinary differential equations with piecewise smooth coefficients* 463
Stepanov, V. D. *On boundedness and compactness of a class of integral operators* 468
Shlyk, V. A. *The geometry of removable sets for the space* FD^p, $p \in (1, +\infty)$, *and Hedberg normal domains* 471
Bakaev, N. Yu. and Bakushinskiĭ, A. B. *On the theory of approximate methods for solving an ill-posed abstract Cauchy problem* 475
Bakhvalov, N. S. and Knyazev, A. V. *A new iterative algorithm for solving problems of the fictitious flow method for elliptic equations* 481
Vavilov, S. A. *A criterion for solvability of the resonance periodic problem in the theory of nonlinear oscillations* 486
Dzhuraev, A. *On elliptic systems in the plane with discontinuous coefficients, and their applications* 490
Makarov, V. L. and Samarskiĭ, A. A. *Exact three-point difference schemes for nonlinear ordinary differential equations of second order, and their realization* 495
Gavrilenko, Yu. V. *Applications of Cooper algebras to tail recrusion theory in logic programming* 501
Znamenskiĭ, S. V. *Tomography in spaces of analytic functionals* 506
Kotlyarov, V. P. *Decomposition of initial data of steplike type in the modified Korteweg-de Vries equation* 510
Amirov, A. Kh. *Integral geometry and the problem of recovering a Riemannian metric* 514
Bogachev, V. I. *The distributions of analytic functionals of random processes* .. 517
Golodets, V. Ya. and Sinel′shchikov, S. D. *Amenable ergodic actions of groups, and images of cocycles* 523
Kondrat′ev, V. A. and Oleĭnik, O. A. *On Hardy and Korn inequalities for a certain class of unbounded domains, and their applications in elasticity theory* 527
Korobov, V. I. and Sklyar, G. M. *On the set of bounded positional controls solving the synthesis problem* 532

Kufarev, B. P. *Boundary correspondence theorems for L_n^1-extendible homeomorphisms of domains $G \subset \mathbf{R}^n$, compactified by means of the metric ρ_G* 536
Malamud, M. M. *Estimates for a system of differential operators in $L_p(\Omega)$. A connection with results of L. Hörmander* 541
Neretin, Yu. A. *On operators connecting holomorphic representations of different groups* 547
Pechentsov, A. S. *On the traces of higher-order singular differential operators* .. 551
Serov, V. S. *On the Green's function in mathematical scattering theory* 554
Sychev, A. V. *Coefficients of quasiconformality of a pair of dihedral wedges and cones* 558
Chikriĭ, A. A. and Belousov, A. A. *The controllability problem for conflict-controlled processes* 560
Table of Contents for the next issue (Vol. 42, No. 1, January–February 1991, Russian original Tom 313, nos. 1–6) 564-a
